About This Software

Visualize and understand concepts.

This app is pretty simple - if you are familiar with CRC (Class Responsibility Collaborator) - this app takes this idea and 5d3b920ae0

Title: VRMakingSense
Genre: Utilities, Early Access
Developer:
Greg Dziemidowicz
Publisher:
Greg Dziemidowicz
Release Date: 20 Oct, 2017

English

So early in development that it should be completely free (it's close). I'm looking forward to the concept, but it's not really usable yet. CSV import/export was broken, so all it lets you do is render a list of items as moveable boxes in a VR world, but no way to get your ideas out of the VR world or save them for later. Other features work as advertised; teleporting controls are non-standard but usable.
