About This Game

WordKiller: Revolution is a spiritual successor of the game *WordKiller: Zorgilonian Chronicles*. The new game has excellent visual style and has become even better and more pleasant.

WordKiller: Revolution is an unusual mixture of a keyboard simulator and an arcade game, in which a user is motivated to learn to print faster and make fewer mistakes in the form of a game.

A player must keep the defense from enemies coming from three lines, killing them by blades. To start the blade, you must print the words that are shown separately for each ready to use projectile. It should be noted that the game has 10 missions with different playing tasks and two game modes.

WordKiller: Revolution is very easy to learn, but only masters can go through all the missions in all the modes. So, the game is suitable for both new and experienced PC users. By the way, fans of bloody deaths and spray of limbs will also like *WordKiller: Revolution*, as it has spectacular murders in different settings.

Combining business with pleasure, *WordKiller: Revolution* is a good alternative to keyboard simulators available in the market.

Features:

- The opportunity to learn to type in English and Russian languages
- Ten missions in each campaign with a gradual increase of difficulty and different game tasks
 - Various game locations
- Dictionary with more than 100,000 words. It's means that the probability of repetition of any word is extremely small
